## PROJECT

<b>Mapin Aja – Hobby</b>
<ul style="list-style-type: none"><li>Built a Website and Geospatial Information System (GIS) for Mapin Aja using Next.js, React, Leaflet, Leaflet-Geoman, Tailwind CSS, Node.js, and Vite. The system allows users to interactively add, edit, and store spatial data through a modern and responsive map interface.</li></ul>
<b>Enameun Frontend – Hobby</b>
<ul style="list-style-type: none"><li>Built a frontend for the Enameun Food Market Information System using Vue.js, Tailwind CSS, and Node.js. The interface enables users to easily browse, search, and view food product listings through a clean and responsive design tailored for usability and performance.</li></ul>

**Photobooth Hobby**

- Built a website photobooth system using Laravel, Inertia.js, Svelte, Tailwind CSS, Node.js, and Vite. The system provides an interactive user experience for capturing, displaying, and managing photo sessions, optimized for real-time performance and ease of use during events.

**Animelist – Hobby**

- Built a website and anime list information system using Next.js, React, Tailwind CSS, and Node.js. Integrated with the Jikan API to fetch up-to-date anime data. The system allows users to browse, search, and organize anime titles into personal watchlists with a clean and responsive user interface.

**CERTIFICATIONS**

<b>LKP BEC - INDONESIA</b>	<b>(September 2024)</b>
